- It has a high level flame retarding feature.
- Dirt-free, like the first day, keep the property for many years.
- It is water-based and does not contain solvents.
- It is flexible and not affected by motion.

Application

The surfaces subject to **Bianca Regata Fire Retardant Paint** application, must be clean and dry, free from all kinds of dirt, oil and dust, as well as old paint remainders. The temperature of the surface and the surroundings must be min +5°C, Max +30°C. Prior to application, **Bianca Regata Fire Retardant Paint** is applied as a primer by thinning 50%. The application should be done with 4 hour intervals. It is applied with a brush or roller to penetrate the surface exactly and equally well. In order to prevent streaky movements on the wide surface, the material should always be thinned with an amount of water, thoroughly mixed, and be applied without break. There should be no extreme wind or air circulation in the application area.

Thinning (Volume)

Ready to use. If necessary, it is thinned with water.

Drying Period (20°C)

First Drying: 15 minutes
Second Layer Application: 2 hours
Final drying: 24 hours

Coverage

Depending on the application and the surface, for single layer, 1 litre will be enough to cover the 2,5 - 3,5 m².

Storage

Shelf life of the product is 2 years in its original can with the lid unopened.

Packing

18,00 kg
