

## Rust - Converter Primer PD-20

Thanks to its special formulation, it is an emulsion that provides the control and neutralization of rust forming surfaces and forms a protective layer.

### Areas of Use

Machinery equipment, spare parts, automotive frames, pipes, water tanks, bridges, valves, train rails.

### Specification

- Protects valuable parts and extends their life.
- Stops old rust in one move.
- Processes such as pickling, scraping, grinding and sanding are not required.

- Prevents the formation of new rust.
- Easily applied. Saves time and labor
- Prepares to paint the floors.
- It forms a primer under the paint that provides protection for years.
- Solvent-free.

### Application

It can be applied with brush and roller. Bianca Rust-converter Primer PD-20 is applied to the surface to form a thin film. The applied surface dries in minutes and the process is completed.

### Thinning (Volume)

Ready to use.

### Coverage

Varies according to application and surface.
